## Utility Rate Survey

### Fiscal Year 2022

---

This is the LENOWISCO Planning District Commission's 35th annual Utility Rate Survey. It contains the water, sewer, and residential garbage collection rates within the LENOWISCO Planning District (Lee, Scott, and Wise Counties and the City of Norton). It is completed each year to help the public agencies providing these services to understand where they stand with respect to their neighbors within the District. Since the last study, the Wise County PSA consolidated the water and sewer systems for Pound with the PSA. Note that the Wise County PSA has a single rate structure for water and wastewater services. Wise County PSA also began offering a garbage collection service to residents not located within the corporate limits of a town or city located in Wise County. Please note, as several providers have different rate structures for residential and "non-residential" (commercial and/or industrial) customers, only residential rates will be noted, calculated and compared.

### Comparing Utility Systems

It is very difficult to compare the rates of one system with those of another. As the information contained in this survey reveals, different systems have straight rates, flat rates, regressive rates, and progressive rates--all in varying increments. As in previous editions of this report, we have tried to devise a consistent yardstick to compare rates by computing an "average monthly bill." The United States Department of Agriculture Rural Development uses 4,200 gallons per month as a consumption rate for the average residential connection. Several authorities and localities have suggested 3,000 is closer to the average monthly consumption of their customer base. Therefore, all "average" monthly bills in this report are based on that rate of consumption.

### A Word of Caution

There are several factors of which the reader should be aware concerning the figures based herein. They are:

1. Municipalities with general taxation authority operate many of the systems. Some of these systems are not supported by water and/or sewer revenue alone but are subsidized by the municipality's

general tax revenue. Rates for such systems may be artificially low because the numbers may not reflect the true cost of system operation. In contrast, public service authorities have no revenue raising capability except user fees and connection fees.

2. Several systems have belatedly started funding depreciation as a means of dealing with the uncertainties of future capital outlay needs. In almost all cases, this has resulted in a rate increase.
3. Some systems are older and therefore, their cost to construct was less. The debt loads on these systems are also lower because they were financed at lower interest rates. The newer systems obviously cost more to construct or rehabilitate and, in some cases, were financed at higher rates.
4. Consumption rates are not uniform throughout the LENOWISCO District. Consumers often use less water where rates are higher, while systems with low rates have customers who use more than the national average. Again, 4,200 gallons per month has historically been selected as the common water usage for the purposes of this survey. However, the study is a tool used by providers in adjusting budgets and rates, an added set of comparisons of 3,000 gallons per month usage will be added moving forward.
5. There are great differences in system efficiency. Accountability rates (the percentage of water produced and accounted for through metered sales) vary widely. Low accountability drastically (and artificially) inflates such costs as chemicals, labor, and power, while high accountability helps keep costs at a minimum.
6. Some systems rely on other providers for treated water. They are often at the mercy of the wholesale provider when it comes to setting their own retail rates, since they have no direct control over their water source costs.

There are other reasons that make comparing one system to another difficult. The reader is cautioned to keep these factors in mind when the data is compared.

## **Wholesale Water Rates**

A table of the District's Wholesale Water Rates is also included in the study. In the LENOWISCO Planning District, there are several water providers that produce and treat their own water. Other water producers only purchase treated water from a neighboring producer, while others may do both. Reasons for this situation include:

- The service area of the retail customer base under development is not contiguous to existing supply lines of the water producer.
- Water needs to be purchased from neighboring producers to supplement existing production or emergency outages.
- A producer may have determined that the water can be purchased from a neighboring producer at a cost cheaper than it can be treated.

For clarification, a “wholesale water rate” is the cost of production of treated water combined with delivery of said water to the point of sale (a master meter). This rate may include other related expenses, such as plant and equipment depreciation plus other costs the producer may deem appropriate. However, it does not include costs that are a result of providing water to the retail user, such as the cost to set and read meters, service line maintenance and tank maintenance except where the tank is the primary supplier of the wholesale water, or debt service and depreciation on the retail side.

## **Sewage Service**

Sewage service is generally confined to municipalities, although each of the Lee, Scott and Wise County Public Service Authorities has multiple systems throughout their various communities and service areas that are the general exceptions. Wise County PSA’s systems in the applicable areas collect but treatment is done at the Coeburn-Norton–Wise (CNW) facility. Higher sewer rates, just like water rates, may reflect the cost associated with newer or recently upgraded systems.

## **Garbage Collection**

Ten communities or authorities provide residential garbage collection. Although LENOWISCO did not attempt to determine frequency or type of collection, the information is provided, again, for comparison.

## **A Closing Word**

The information included in this report was derived from the data available on the provider’s website or given by email, phone or fax. Keep in mind it is only as reliable as the information received.

For communities seeking financial assistance from Rural Development, the Virginia Department of Housing and Community Development’s Community Development Block Grant Program, the Virginia Department of Health’s Financial and Construction Assistance Program, or other grant/loan programs, user rates are a major factor in determining percentage of grant versus loan, or whether a project is fundable at all. Utility systems should be operated as efficiently as possible, and the rates should generate sufficient income to support them. Systems with unrealistically low rates should not expect any significant grant assistance from the aforementioned agencies and programs. The few remaining Federal programs for water and sewer financial assistance are geared toward helping communities who are trying to help themselves. This is particularly important for those localities facing mandated sewage system renovations.

## LENOWISCO Planning District Commission Overview of Utility Rate Changes FY 2018 – FY 2022

**(Based on District-Wide Average Monthly Rate at  
3,000 Gallons Usage per Month)**

Service	FY18	FY19	FY20	FY21	FY22
In-Town Water	\$29.50	\$30.33	\$30.75	\$31.59	\$32.68
		+2.8%	+1.4%	+2.7%	+3.45%
Out-of-Town Water	\$39.43	\$39.98	\$41.30	\$42.69	\$43.78
		+1.4%	+3.3%	+3.4%	+2.55%
In-Town Sewer	\$32.96	\$34.99	\$35.74	\$36.81	\$37.70
		+6.2%	+2.1%	+3.0%	+2.42%
Out-of-Town Sewer	\$46.75	\$49.26	\$52.31	\$54.21	\$55.70
		+5.4%	+6.1%	+3.6%	2.7%
Residential Garbage	\$9.68	\$9.77	\$10.09	\$10.09	\$10.90
		+0.9%	+3.3%	0.0%	+8.0%*1

For the purposes of this report, the historic rate change chart has also changed to be based on 3,000-gallon usage data.

## NOTES

\*<sup>1</sup>Wise County PSA is now offering a solid waste collection to residential and commercial customers across Wise County. The residential collection service is available to residents not located within the corporate limits of a town or city in Wise County. The added service explains the significant increase in residential garbage rates (+8.0%).

\*<sup>2</sup>Appalachia, Big Stone Gap, Jonesville, and Norton include additional fees in the calculated and ranked water and/or sewer rate charts.

\*<sup>3</sup>Wise County PSA provides all water and sewer services for Pound customers.

\*<sup>4</sup>Scott County PSA provides in-town water and sewer services for Clinchport, Duffield, Nickelsville and Weber City.

\*<sup>5</sup>Lee County PSA provides out-of-town sewer services for Jonesville, Dryden and Woodway. This will be reflected in the combined services rates.

\*<sup>6</sup>Scott County PSA provides out-of-town sewer services for Gate City. This will be reflected in the combined services rates.

\*<sup>7</sup>Wise County PSA offers an optional "Loss Protection" product at a fee of \$3.00 for water and \$3.00 for sewer. The funds collected go to a 3<sup>rd</sup> party vendor for their service.

\*<sup>8</sup>Town of St. Paul differentiates in-town (\$8.50) and out-of-town (\$10.50) residential garbage collection.

\*<sup>9</sup>Town of Dungannon water and sewer rates are proposed rates and are expected to be approved May 2<sup>nd</sup>, 2022.
